# Discover (Display: Thumbnails)

Options:  
- "Thumbnails" will show the posts as small tiles in a grid  
- "List" will show the posts underneath each other with their description  
(see "Discover (Display: List)")

Options:  
- "Most popular" will show the posts with the most upvotes during the last 7 days  
- "Most recent" will show all posts in chronological order

Refreshes the posts with the selected display options

Up- or downvote function of a post  
Only works for logged-in users

Opens the browser's file chooser

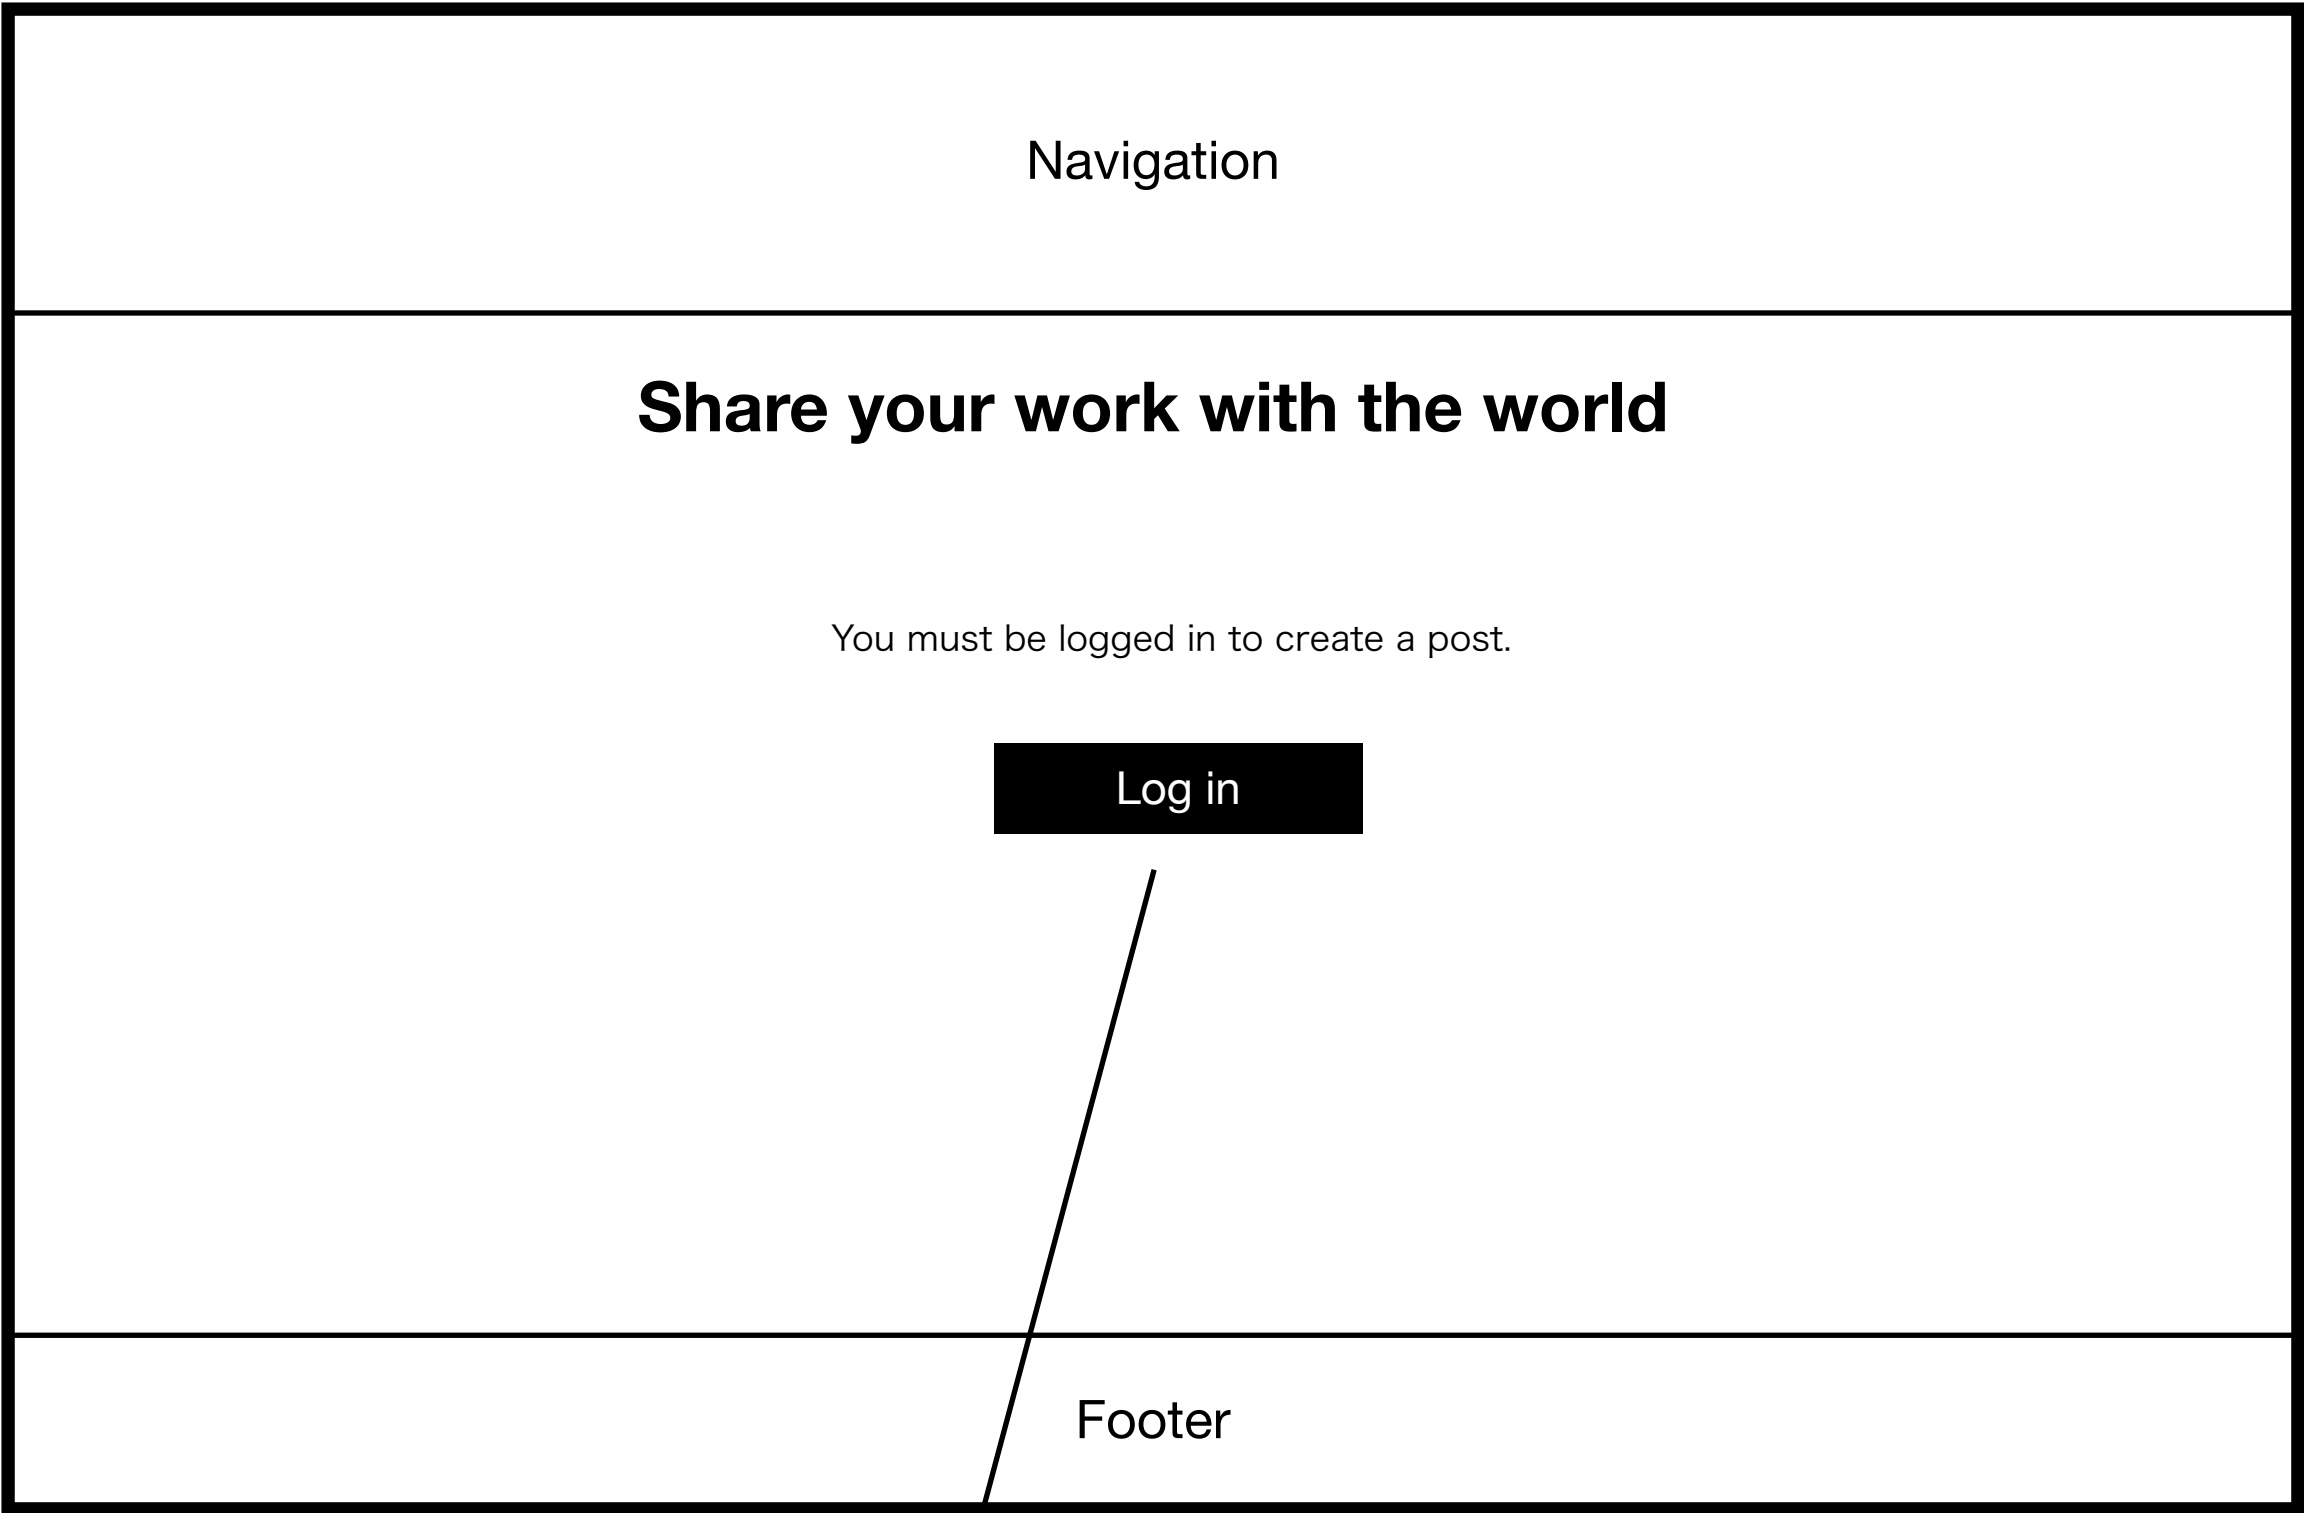

- Available options:
- All rights reserved
  - CC BY-NC-ND
  - CC BY-ND
  - CC BY-NC-SA
  - CC BY-NC
  - CC BY-SA
  - CC BY
  - Public domain / CC0

Make sure that the description is not too long and that a file is selected. If so, upload and save the image and create the post in the database.

# Upload (not logged in)

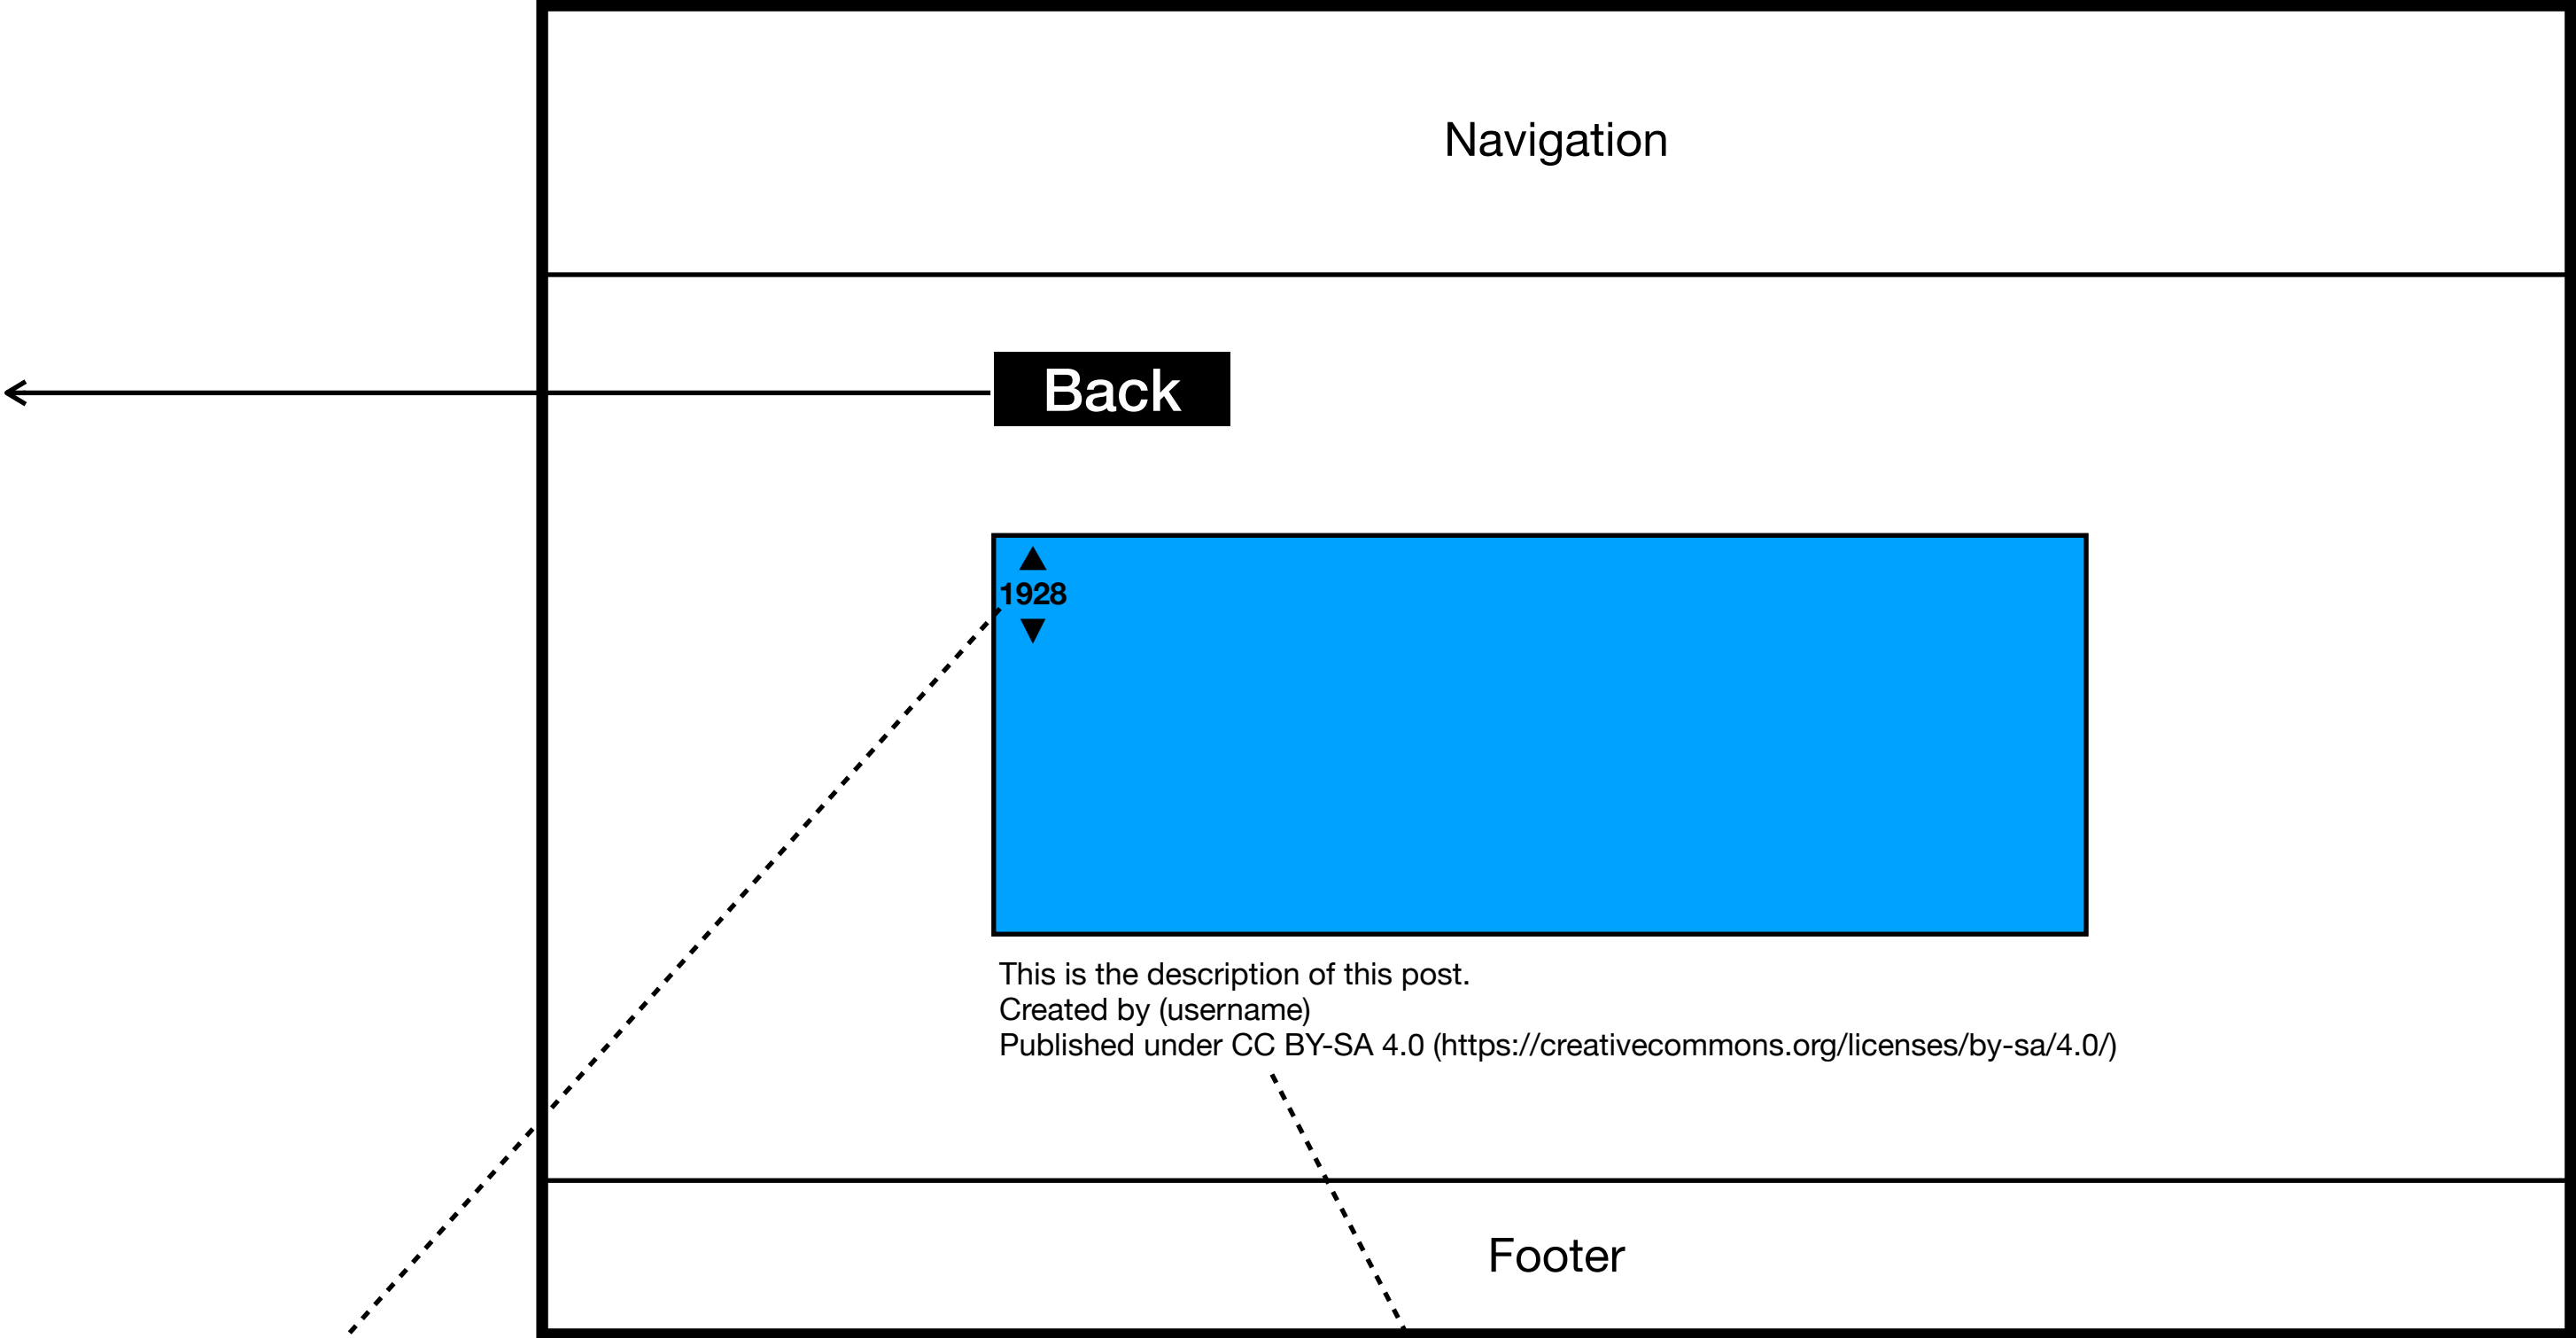

Displayed when the user opens the upload page without being logged in

# Post

This is the detail view that is opened by clicking an image in the gallery view.

Takes the user back to the last page

Up- or downvote function of a post

Description and license text of a post

# Profile

This is the screen where  
an user can set a profile  
picture and username

Navigation

Set a display name

Shioyama-senpai

Save information

Footer

The display name is optional.  
Posts of users without a display name  
will show "Anonymous" as the creator

Saves the display name

# Login

Users log in with a unique string which is called the user token. No registration is required. The first time a token is used, a user entry is created for it.
